

PROCEDURE FOR ADMINISTRATION OF PRESCRIBED MEDICATIONS

Students have a right to receive prescribed medication in school hours if this enables them to access education. Staff members have a right to choose whether or not to take responsibility for administering medication to a student. In general, all prescribed medication is administered by the office staff, or designated support staff. Students hand their medication into the office and go over to have it administered at the arranged time.

Parents need to provide written authority for the administration of prescribed medication (form attached). This will detail the medication to be administered, the specified dosage, frequency of dosage, and the time for which the medication is to be given.

It will be made clear to the parents or guardians, that while the school is prepared to assist with the administering the medicine, the school cannot and will not accept responsibility for any of the following:

- Any error arising from the administering of the medicine.
- The pupil's failure to take the medicine.
- Any health problems that may arise as a consequence of taking the medicine.

Prescribed medication will only be administered by a staff member once the agreement is signed. It is the parent or guardian's responsibility to inform the school of any change in the student's medical circumstances.

Each time the medication is administered, a register will be signed.

Medications need to be in their original packet with prescribing directions on it.

Medication will be stored in the Receptionist's office, in an area not able to be accessed by children or in the refrigerator in the Principal's office.

Parents or guardians will be advised of these procedures via the school website, newsletter and at time of enrolment.

All medical data will be updated annually.

For education outside of the classroom (eg school camps), parents must authorize on the consent form authority for the teacher in charge to have the responsibility to administer medicines.
